ALVEUS
An expression of taste

Presentation of trademark Alveus

Alveus

The Alveus brand products are designed for modern high-end kitchens. In today's interiors, the boundaries between the kitchen and living area are becoming blurred, while minimalist, refined and sophisticated design solutions have begun to gain ground.

With their large, clean surfaces and innovative approach to space use, Alveus sinks perfectly match the latest furniture and architectural ideas. They are made for kitchens just like that, as their outstanding design and functional qualities exceed the existing standards in many ways.

The carefully designed solutions will enhance your food preparation and kitchen work efficiency. Alveus sinks are manufactured from top-quality modern materials, which ensures easy and environment-friendly maintenance and decomposition.

About manufacturer

Kovinoplastika Lož from Slovenia is one of the largest and most successful European suppliers of kitchen sinks and related equipment, which boasts a 65 year tradition. It is an international company, which has earned its enviable position in the kitchen equipment market by pursuing the highest quality standards, keeping pace with modern design trends, and being a flexible and reliable business partner.

Due to its products, which boast not only outstanding quality but also an excellent quality/price ratio, Kovinoplastika Lož is quickly and effectively strengthening its market positions in Slovenia as well as in other European countries.

The Alveus brand sinks are available in many markets seven of which are controlled successfully by Kovinoplastika Lož through its subsidiaries and the rest through long-term successful partnerships with local companies.

Apart from manufacturing and marketing the Alveus brand products, Kovinoplastika Lož successfully manages the production programmes of other own brands, among which the building hardware and joinery brands stand out.

Gastronorm programme is designed for use in the catering and hotel industries and in canteens. Kovinoplastika Lož has a long tradition in cooperating with europeans most important companies in field of components.

As Kovinoplastika Lož is one of the most important centres of manufacturing knowledge in the region, the company also boasts a long tradition of successful tool manufacturing service marketing and sophisticated tool and machine manufacture and marketing.

Installation Types

Alveus sinks are suitable for various installation types, thus adjusting completely to design and architectural requirements of your kitchen.

Inset sinks are installed into kitchen worktop, thus forming part of continuous working surface. Sink is inserted from above into a suitable worktop cut-out and fastened with supplied clamps.

I

Flush mount sinks are installed into previously adjusted kitchen worktop made of waterproof material (natural stone, composite material, glass, impregnated solid wood). Surface of the sink and surface of the worktop are in the same level. The main advantage is seamless working surface that enables very easy cleaning and an attractive appearance.

F

Flat mount sink are installed into kitchen worktop so that a uniform working surface is created. Thin, almost unnoticeable rims allow quick and easy cleaning. An additional advantage is simple installation from above into each type of kitchen worktop.

S

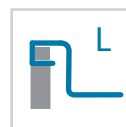

Undermount sinks are installed into kitchen worktop from below. Worktop must be made of waterproof material, such as natural stone and composite material. This type of installation enables various combinations of undermount bowls in different sizes. Absence of seams between sink and worktop contributes to simple hygiene maintenance and overall appeal of a kitchen.

U

Sit-on sinks assume the function of kitchen worktop by replacing it on top of a kitchen cabinet. They either “sit” at the end of a worktop or connect two worktop ends (one on each side). Alveus Sit-on Sinks normally have a rear wall rim of 30 mm, however there are a few versions without it (please see individual sinks description). The sinks can be installed in combination with standard worktops of 30 mm thickness.

L

B

They are fastened by means of integrated wooden frame (type L) or by using factory-made screw holes (type B).

Selection Guide

When buying a kitchen sink it is recommendable to, consider the following:

Cabinet width – first of all, you must know the size/width of the sink cabinet, which has influence on your choice.

Our sinks are classified according to the minimum required cabinet width, namely 400, 450, 500, 600, 800, 900 and 1000 mm plus 900x900 mm corner cabinet. Smaller kitchen sinks can be accommodated by larger cabinets, but never vice versa. For instance, a sink dimensioned to fit a cabinet of 400 mm minimum width can also be installed into any cabinet exceeding the designated size.

Sink orientation – once you have determined the cabinet width, you have to determine orientation of the sink on the kitchen worktop. You can choose among left-hand, right-hand and reversible sink designs. Most of sinks are reversible, you need not to worry about the orientation upon your purchase, as you can turn the sink with its main bowl(s) according to your needs.

In the next step, you can **choose among various materials** (stainless steel or composite material), **various installation types** (inset, flush mount, flat mount, undermount or sit-on) and, **various sink designs**.

CONFIGURATIONS

Alveus kitchen sinks come in various orientations to adjust perfectly to your kitchen requirements. To make your decision easier, every sink presentation in this catalogue includes a list of available varieties.

left-hand	main bowl on the left, drainer on the right
right-hand	large bowl on the right, drainer on the left
reversible	any arrangement possible; bowl on the left or on the right
corner	can be installed into corner cabinets (some models also into regular cabinets, depending on model dimensions).

Top-Quality Materials

Alveus kitchen sinks are available in several materials, surface finishes and colours. Apart from the stainless steel sinks various finishes, our offer includes selected models in combination of tempered glass with stainless steel and models from high-quality composite material Algranit and Granital. In the wide range of composites, you will certainly find the one that will blend into your kitchen or create with the kitchen a beautiful contrast.

Premium Stainless Steel

The main characteristics and advantages of 18/10 stainless steel are:

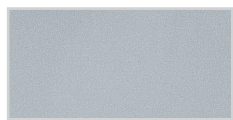

- Easy cleaning which ensures a high level of hygiene
- Resistance to high temperatures and rapid temperature changes (thermal shock)
- Resistance to impacts
- Resistance to chemical influences
- 100 % recyclability

The stainless steel (CrNi) thickness ranges from 0.5 mm to 1.0 mm depending on the price range of the sink.

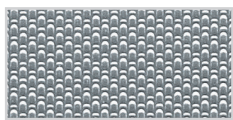

Surface finishes

Alveus stainless steel kitchen sinks are available in four surface finishes, all of the high quality but with a different appearance. The stainless steel surface of Alveus basic models is untreated and unpolished (NAT) what gives them a semi-shiny and smooth texture.

After brushing the surface in an only straight direction, we obtain brushed (BRS) stainless steel which appears in a bit mat dark and elegantly scratched surface. Brushing the sink surface in various direction gives it a silky glow with satin shine (SAT). Leinen (LEI) surface finish has an appearance of tiny pattern what makes a stainless steel less sensitive to tiny scratches but requires a bit more care.

SAT (Satin)

LEI (Leinen)

BRS (Brushed)

NAT (unpolished)

Special surface treatment of stainless steel

A thin vaporised metal substance known as ceramic nitride is deposited onto stainless steel surface, resulting in unique metal lustre and increased scratch resistance.

The surface-treated stainless steel is available in four precious metal colour shades - GOLD, COPPER, ANTHRACITE and BRONZE.

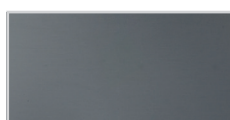

Due to the nature of surface treatment process, each sink ends up with unique colour shade.

COPPER

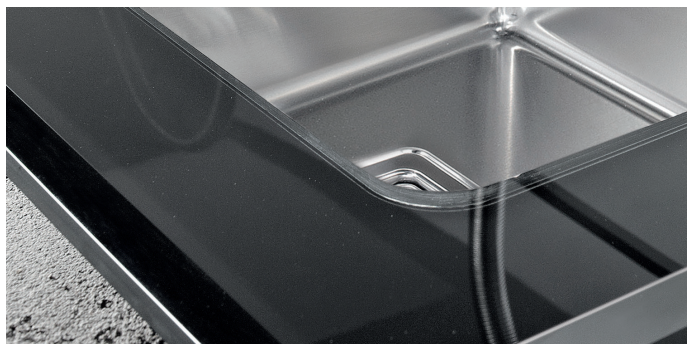

GOLD

ANTHRACITE

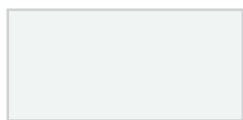

BRONZE

Tempered Glass

Tempered glass is a safety glass with emphasis on toughness and thermal resistance. There are two available colours - black and white which will bring uncompromising elegance and style into every kitchen. You may also order customized glass surface with the colour or graphics of your choice.

Colour range

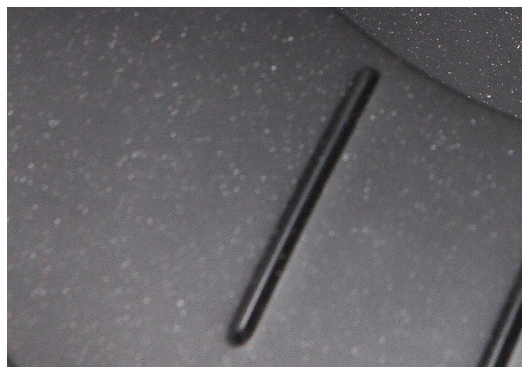

white

black

Graphics on request

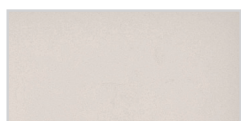

Granital composite material

Granital composite material is a mixture of 75-80% granite particles bound together by high-quality binder, which provides strength and flexibility to a kitchen sink as well as the resistance to temperature shocks. Sinks in Granital material are available in various colours to which we added extra four Granital Plus shades with metallic shimmering parts which give to the sink an elegant high-end look.

Careful surface treatment makes kitchen sink smooth and pleasant to the touch. The smoothness of the surface provides an easy cleaning of the kitchen sink. Increased material sturdiness and cleaning in accordance with the instructions guarantee a long service life to these sinks.

SPECIAL OCCASION SPECIAL KITCHEN SINK

With 50 years of experience, passion, vision and a bit of courage Alveus launched a limited edition of a special kitchen sink - JUBILEE.

Its combination of clean and organic lines will perfectly match the modern kitchen design and give it a bit of a kick with its flowy shape.

We complemented its original design with an aesthetic and super functional PUSH Pop-Up drainer system, which allows you to manage the nicely hidden waste outlet by just pushing a button.

For some extra functionality, we added complimentary chopping board to each Jubilee kitchen sink, beautifully designed out of noble walnut wood. The chopping board will smoothly glide above the bowl and greatly help you with your everyday chores.

Make your kitchen stylish and homey with the perfect combination of organically designed Jubilee and warm walnut chopping board.

PUSH

Pop-Up siphon

... with just a push of a button

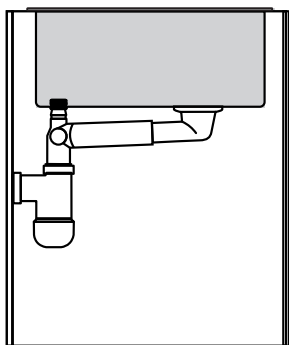

UNIVERSAL

The siphon can be used (installed) on various kitchen sink models.

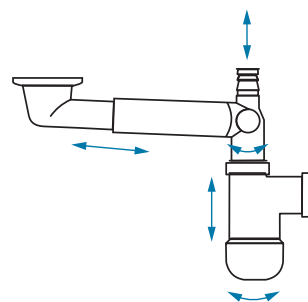

SPACE SAVING

The PUSH Pop-Up siphon is designed and assembled thoughtfully to take as little space under the kitchen sink in your cabinet, leaving enough space for an extra drawer, waste bins....

PRE-ASSEMBLED & ADJUSTABLE

You will not need to waste time and patience for assembling many small parts. The PUSH Pop-Up siphon has already been put together for you. All you need to do is to adjust the siphon to fit perfectly to your kitchen sinks.

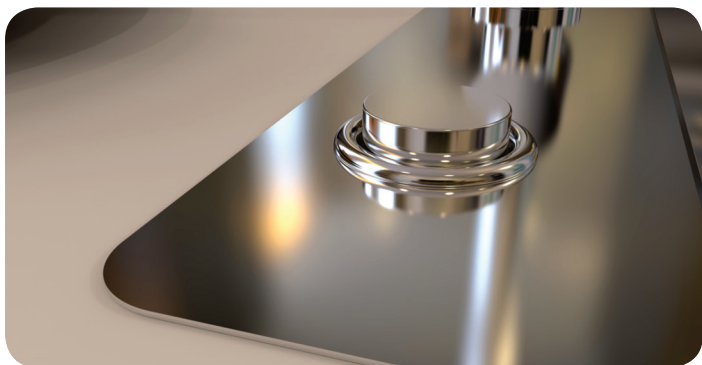

HIGH-END LOOK

PUSH Pop-Up button and drainer plate are not only functional but with its clean lines and smooth surface they give your kitchen sink a high-end and prestigious look. To make the look of your kitchen sinks perfect we added an aesthetically hidden overflow.

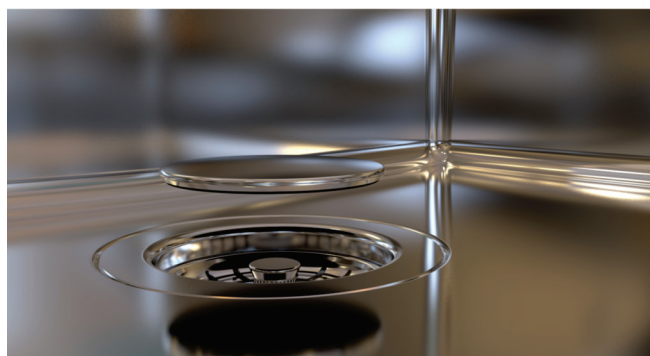

AUTOMATIC

The drainer can be managed with just a push of a button.

MAGNETIC DRAINER COVER

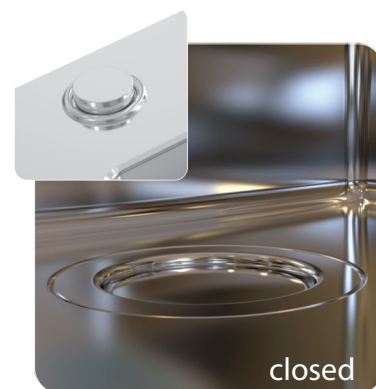

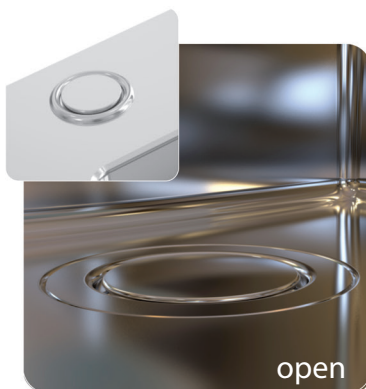

The drainer plate is elegantly attached on the drainer grid with a magnet, the manipulation is therefor very easy.

EASY MANAGEMENT

Managing the PUSH Pop-Up siphon is very easy ... simply by pushing a button. When the button is in the level of the kitchen sink, the drainer is open to the flow of the water and other liquids. At the push of the button, it rises above the surface of the kitchen sink, indicating that the drainer of your kitchen sink is closed and you can fill it up with water.

When using your kitchen sink for more demanding kitchen tasks with a bit more food waste or when you just want to clean the drainer plate, you simply remove it from the grid and lay it back when desired.

Pure Up

Kitchen sinks Pure will surely be a focal point of your kitchen. Your eyes will admire its sophisticated design, clean lines and impeccable shine. Enormous bowls will make you want to clean the dishes over and over. Radius 15 gives a sink an elegant design and yet it makes a sink easy to clean. As the design itself is not enough, we upgraded an elegance of the sink with F and S installation which makes a sink become one with the worktop.

All Pure models are now available in Up-graded version with a new PUSH Pop-up drainer system which gives a kitchen sink a totally high-end look and extra functionality with just a push of a button. Besides, the version is also equipped with removable magnetic waste cover.

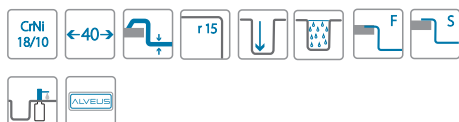

- modern, timeless design
- clean lines and smooth surfaces make it perfect to fit the sink to every kitchen style
- high quality stainless steel of 1mm thickness
- bowl radius of 15mm
- spacious bowl in deepness 195mm
- choice of flat mount inset (S) or flush mount inset (F)

- enclosed Push Pop-up waste kit for super easy handling
- aesthetically concealed overflow
- aesthetically hidden outlet
- large round waste outlet (fi 90mm)
- above-average soundproofing
- packed in the carton

STAINLESS STEEL

Stricto

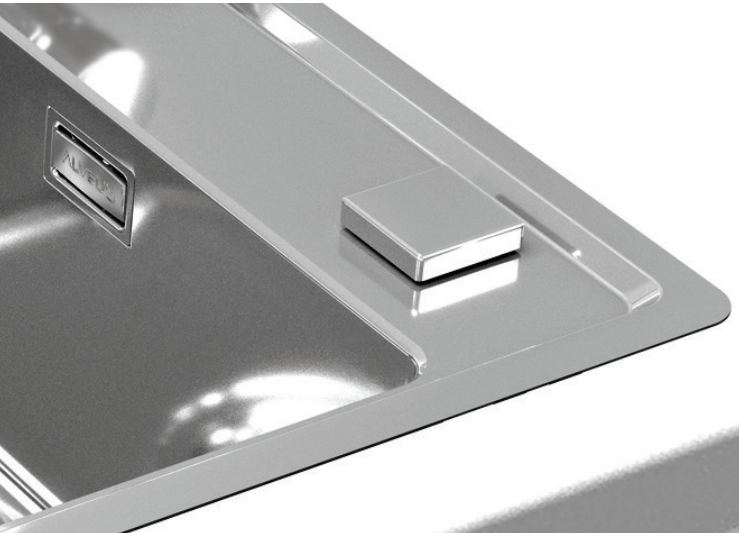

With kitchen sinks Stricto we took a different approach to its functionality. We wanted to clear the drainer surface for more and easier manipulation and so moved the mixer tap “dashboard” to the side of the kitchen sink.

With moving the mixer tap „dashboard” to the side of the sink, we took down a few cm off the kitchen sink width and gave some extra space at the back of it, maybe just enough to put away a glass, sponge....

Adding extra characteristics like clean and modern lines, big and deep bowl made of high-quality stainless steel and all this complemented by highly useful Pop-up siphon we get a great combination of design and functionality.

You can choose from 3 different models, one of them reversible.

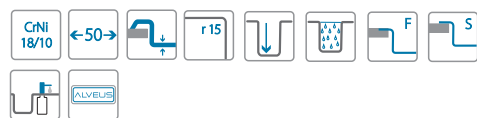

- the bowl radius of 15 mm in combination with 205 mm depth provides for a considerably larger dishwashing space
- 1 mm thick stainless steel ensures greater rigidity and stability of the sink
- flat mount inset (S) or flush mount inset (F) installation add to the clean design
- flush mount inset (F) installation with seamless edges enables simple cleaning
- side mixer tap position on the sink what makes drainer surface cleaner and more spacious

- contemporary and minimalistic design
- clean lines and smooth surfaces – easier cleaning
- Pop-up system – enables remote water-draining management
- flush mount inset (F) installation – suitable for waterproof worktops
- flat mount inset (S) installation – possible installation into every type of kitchen worktop
- aesthetically concealed overflow – prevents jamming of sponge or cloth
- clean lines and smooth surfaces – enable simple cleaning and maintenance
- smooth draining surface, inclined towards the bowl – prevents line scale sedimentation
- bowl inclination towards the drain opening – enable water to drain-off faster
- optional accessories
- large strainer bowl adds to the sink functionality
- a glass board slides along the entire length of the sink
- round waste outlet – Ø 90 mm
- enclosed Pop-up siphon
- above-average soundproofing
- possibility of under - window installation

STAINLESS STEEL

Galeo

Galeo family is designed to fit into every style and size of the kitchen. We combined the clean, modern design of the drainer surface with spacious bowls. 40 mm bowl radius is a great compromise of straight modern lines and soft edges that allow an easy cleaning. An optimal bowl radius has been combined with great depth and resulted in huge, spacious bowls. Galeo models are available in 3 dimensions with 3 different bowl sizes – from large to extra large.

- Original teardrop-design of drainer surface
- reversible models
- bowl radius 40 mm – a great compromise of elegance and functionality
- above average large and deep bowl – 190 mm

- round waste outlet – fi 90 mm
- Pop-Up draining system – enables remote water-draining management
- aesthetically concealed overflow

STAINLESS STEEL

Elegant

The Elegant sink family suits almost any kitchen, for their classic design maintains timeless appeal. Various bowl sizes and configurations with or without the drainer surface compose the variegated kitchen sink family. The large bowl has an above-average depth of 190 mm, while the depth of the smaller bowl amounts to 130 mm. You can choose among models made in stainless steel with different surface finishes as well as among a wide range of suitable accessories.

- **iconic models**
- **it is possible to choose among two stainless steel surfaces - SATIN and LEINEN**
- **reversible models**
- timeless design of the draining surface
- above-average bowl depth – 190 mm
- round waste outlet – Ø 90mm
- enclosed space-saving siphon – provides for more free space in the cabinet

Luno

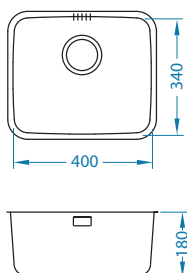

Luno undermount bowls are designed for large to extra large kitchen needs. Three large and deep bowls will provide enough space to wash all the huge pots and trays after your party. The bowls are not only functional but also quite stylish with its bowl radius of 40 mm, which is quite eye-catching and easy to clean.

- bowl depth 180 mm
- bowl radius 40 mm – a great compromise of elegance and functionality
- aesthetically concealed overflow
- type of installation - undermount (U)
- installation into countertops made from water-resistant materials – stone, composite, waterproof wood
- round waste outlet – Ø 90 mm

Karat Up Wave Up Glassix Up

Karat up, Wave Up and Glassix Up kitchen sinks with glass top will bring creative elegance and colour into your home. These sinks are made for most demanding users, who require not only uncompromising quality, but also cutting edge design and who dare to try something different. The sinks are available in four amazing designs in different models and colours. They are manufactured from premium stainless steel and equipped with glass top made of tempered steklena.

Up-graded versions with a new PUSH Pop-up drainer system are of high-end look and offer extra functionalities thanks to a push Pop-up handle and removable magnetic waste cover.

Tempered steklena improves the mechanical properties of the glass by greatly increasing its toughness.

- the glass top is made of tempered glass of above-average thickness which makes the surface harder and heat resistant
- deep, spacious sink bowls are made of high-grade stainless steel
- compactness of the product enables stable installation of the heaviest mixer taps
- possibility of ordering the glass surface in any RAL colour shade or with unique graphics of your choice
- in addition to the sink, the standard kit contains:
 - Push Pop-up waste kit

- contemporary and timeless design
- clean lines and smooth surfaces – enable easy cleaning and maintenance
- an aesthetic combination of the kitchen sink with črni or white tempered steklena
- the glass surface enables quick and easy cleaning thereby ensuring hygiene of surfaces
- prefabricated holes Ø 35mm for the installation of the mixer tap, Pop-up siphon
- Pop-up system – enables remote water-draining management
- aesthetically concealed overflow – prevents jamming of sponge or cloth
- precisely and fine-ground edges of the glass drainer surface - prevent possible cuts and reduce the possibility of damaging the sink to a minimum
- above-average soundproofing

KITCHEN MIXER TAPS

Alveus kitchen mixer taps are technologically sophisticated and come in various shapes to complement traditional as well as trendy kitchens. The numerous varieties with regard to installation, operation and surface finishes allow an abundance of combinations.

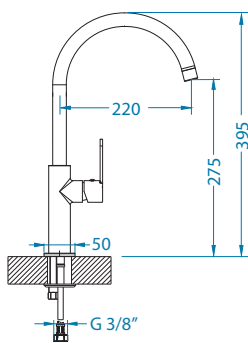

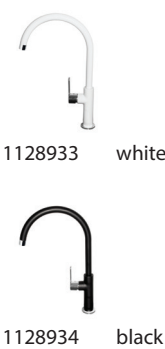

- Taps are made of brass with surface finish polished chrome (CHR), brushed chrome (CHR-BR), Alveus colour range and ceramic nitride (PVD-treatment) in four shiny colours (Gold, Copper, Anthracite and Bronze)
- Several models are made of stainless steel with satin surface finish (SAT)
- Ceramic discs and metal handles ensure reliable operation and long service life
- Taps can operate with water pressure from 0,5 to 8 bar (recommended 1 to 5 bar)
- Taps are of swivel body or swivel spout
- Several models are fitted with pull-out spout and spray function
- Taps can be installed on the sink or kitchen worktop
- Some models have movable spout, which is convenient for under - window installation
- Two flexible hoses with 3/8" connections ensure simple and fast installation to dual (hot-cold) water supply system
- Models with mark - are equipped with three connection hoses and can operate only with cold water supply, delivering hot water instantaneously on demand by means of un-pressurised water heater (usually electric boiler)
